

Vigilante Mining Equipment

VME-24 Production Wash Plant

Vigilante Mining Equipment, LLC is launching our VME-24 Wash Plant. This unit has been designed with the small miner in mind though large projects can benefit from versatility and reliability of this unit as a sampling machine, with it's ease of setup and use and the fact that it is a "Truly" Mobile unit. Valuable time is not being wasted, setup and teardown of this unit can be accomplished in only a matter of minutes. All components are stored on-board for easy and complete transport to your site. All VME-24 systems come complete with a 2" water pump and 3500 watt generator, electrical cords, hoses and even a clean up tub and pans. With our quality construction and reliable components, you can be assured that when you reach your site this unit will perform as promised. There are many options available from Magnetic Separators to Security Cages for the sluice boxes. We can furnish complete wash plant systems for any size mining operation. Whether your specifications or ours, you will have the same quality & reliability that have made us the company we are today. Whether complete systems or simply adding modules to existing equipment we will be there for you. Please feel free to contact us with your questions. We look forward to working with you on your next mining endeavor. Our facility is located in Helena, Montana and is always open, if you would like to take a tour.
